

**Presenters at the
EMN Norway's National Conference, 1 June 2017
The use of Technology in Identity Verification**

Bronwen Manby is an independent consultant and visiting senior fellow at the London School of Economics Centre for the Study of Human Rights. She previously worked a decade each for the Open Society Foundations and Human Rights Watch, as well as for Lawyers for Human Rights, South Africa. She has written extensively on statelessness and the right to a nationality in Africa, including several studies for UNHCR. Recently, she has been writing on questions of identification more broadly, including a chapter on [“Legal identity for all” and childhood statelessness](#) in the January 2017 edition of the report *The World's Stateless* published by the Institute for Statelessness and Inclusion, and a study for the World Bank on [Identification in the Context of Forced Displacement](#) published in 2016.

Philippe Van Triel, Policy officer, Unit Information Systems for Borders and Security, DG Home, European Commission. Philippe Van Triel is a policy officer within the unit of Directorate General Home Affairs which is at the origin of the European IT systems for borders and security like most recently the Entry-Exit System and ETIAS (European Travel Information System). As such he has participated in the study and pilot that prepared the new legal proposal for EES and in the preparation work for ETIAS. Within the same unit, he was part of the Commission's project management team that delivered the SIS II (Schengen Information System of the 2nd generation) and the VIS (Visa Information System).

Per O. Haddal is Head of the ID Documents Department at the National ID Center, which includes the National ID Center's specialist education, since 2010. Prior to his current position, Haddal has 18 years of experience as document investigator at Kripos, NCIS. Haddal has also been a representative in the EU Council Working Group on false documents (Working Party on Frontiers / False Documents Mixed Committee) as well as Board Member in the European Document Experts' Working Group (EDEWG) under the European Network of Forensic Science Institutes (ENFSI) from 2007 to 2015.

Maria Gabrielsen Jumbert is Research Director, Senior Researcher at The Peace Research Institute Oslo (PRIO). She has since 2011 researched EU's border surveillance in the Mediterranean, the development of the EU's Border Surveillance system EUROSUR, and the interfaces between security and humanitarian responses to the migrants crossing the sea to reach Europe. Her background is in political science and international relations, with a PhD from SciencesPo in Paris (2010). She is also Director of the Norwegian Centre for Humanitarian Studies, a collaboration between CMI, NUPI and PRIO, with an aim to promote critical and relevant research on key humanitarian issues. She has co-edited the recently published "The Good Drone", and currently works on the role smart phones play as a tool for migrants, as well as how smartphones may be used to monitor a person's movement.

Kathrine Qvenild is a Senior Adviser working with the Modernisation programme at the Norwegian Directorate of Immigration (UDI). She has for a number of years worked with IT, case management, migration and user experiences. Qvenild was previously part of the EFFEKT-program that developed electronic archives, the VIS-connection and online solutions. She is currently working in a biometrics project organized by UDI together with the Norwegian Police and the Ministry of foreign affairs.

Kris De Groote is a senior researcher at Cedoca, the Country of Origin Information (COI) desk of the Commissioner-general's office for refugees and stateless persons (CGRS) in Belgium. He is specialised in automated information collection, social bookmarking and social media research. He is a trainer on Facebook research for Protection Officers.

De Groote started in 2004 as a COI researcher on Iran and the Balkans. Since 2016 he is responsible for an AMIF project on the use of New Media in Online COI Research. Currently he is working on establishing a "New Media Unit" within Cedoca. This Unit will focus on continuous social media trainings for the employees of the CGRS and will give assistance to the COI Experts in complex researches.

Jan-Paul Brekke is a sociologist and a Senior Research Fellow at the Institute for Social Research in Oslo. His fields of expertise include migration and asylum policies, integration and inclusion, harmonization of European migration regulation, migration destination patterns and motivations, and how migrants experience migration laws and practices.

His latest publication (in Migration Studies) analyzes the connection between asylum regulations and flows. Brekke is frequently used as expert commentator in Norwegian media.

Sveinung Hilmy Wetteland is trained as a Police Officer and has over the past year specialized in mobile forensics in the immigration field. Wetteland is representing the Police Immigration Service's Technical Team, which is responsible for document investigation and digital forensics
